Flexx Beacon provides bluetooth communication/proximity scanning between your Universal Robot and your manufacturing work cell.

Give your operators a repeatable and efficient process when your robot experiences job changeover.

The Flexx Beacon enables...

Bluetooth Technology to Locate & Connect the Robot to Surroundings	**Positional Awareness, Allowing Efficient Mobility**	**Intelligent Layer to Load Correct Part & Program**	**Redeployment With Operator. Adding Reliable Process to Mobility**

Specifications

Scanning Range	Up to 4ft	**Power**	Battery (Lithium 3V)
Communication	BLE 5.0	**Beacon Spacing**	3-100ft
IP Rating	67	**Lead Time**	1 Week
