

FlexxReference™

Free Your Robot. Redeploy Your Universal Robot in less than 15 mins

Maximize utilization and accelerate ROI of your cobot with the FlexxReference™ intuitive robotic software/hardware 6-degree offset tool.

"By using the FlexxReference™, setting up a new robot run is simple, repeatable, and fast"

- Jon Gelston, AIM Processing

FlexxReference™ ensures that your robot is never idle by giving you the ability to:

Easily repurpose it from one work cell to another when demand changes

Get your work cell up and running after planned or unplanned downtime

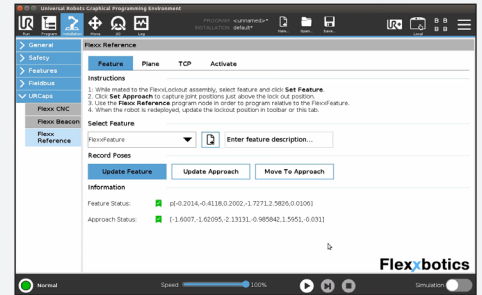

Switch your work cell from manual to automated mode

React to accidental or deliberate work cell adjustments

Offset your cobot program in under 2 mins with 3 easy steps
